Risk factors pertaining to the issue	Risks Relating to Reduced Face Value Debentures and Limited Market Liquidity The Debentures are being issued at a face value of Rs.10,000 each pursuant to the SEBI NCS Master Circular, which permits issuance of listed debt securities on a private placement basis at a reduced denomination from the standard minimum face value of Rs.1,00,000. The reduced denomination does not mitigate any credit, liquidity, interest rate or other investment risks associated with such securities. Any security structure, credit enhancement or repayment mechanism (if applicable) will be as specified in the relevant offer document. Although the Debentures may be listed on a recognised stock exchange, there can be no assurance of liquidity or the development of an active secondary market. RISK OF THE ISSUE BEING TREATED AS A DEEMED PUBLIC ISSUE The Issue is being made strictly on a private placement basis to identified eligible investors and is not intended to be an offer to the public. However, if the Debentures are subsequently offered, distributed, transferred or down-sold in a manner that suggests that the private placement was made with a view to onward distribution to a wider investor base, including through arrangers, brokers, distributors, platforms or other intermediaries, the Issue may be alleged or treated as a deemed public issue / non-compliant private placement. Any such regulatory determination may result in penalties, refund obligations, additional disclosure or compliance requirements, restrictions on future fund raising, delay in listing or trading, reputational impact and other adverse consequences for the Issuer and/or relevant intermediaries. This may adversely affect the liquidity, transferability and value of the Debentures. Deterioration in Asset Quality, Liquidity Position and Loan Portfolio Performance May Adversely Affect the Issuer The Issuer's business and financial performance are subject to various risks, including an increase in borrower delinquencies and non-performing assets, higher provisioning and loan write-offs, asset-liability mismatches, dependence on timely refinancing and concentration of its loan portfolio in

	unsecured retail lending. Any deterioration in the repayment capacity of borrowers, delay in loan collections, inability to obtain additional borrowings or refinancing on acceptable terms, or adverse regulatory changes relating to unsecured lending may increase the Issuer's credit costs and place pressure on its liquidity and profitability. The occurrence of any such events may adversely affect the Issuer's business, results of operations, financial condition and ability to meet its obligations, including payment of interest and repayment of principal in respect of the NCDs. Proposed Merger of Profectus Capital Private Limited with the Issuer May Affect the Continuity, Enforceability and Maintenance of the Security Cover for the Debentures The Debentures are secured by a pledge over equity shares of Profectus Capital Private Limited. The Issuer proposes to merge Profectus Capital Private Limited with itself. Upon completion of the merger, the pledged shares may cease to exist or may no longer be capable of being held or enforced in their present form. There can be no assurance that replacement security will be created in time or that the required Security Cover will continue to be maintained. Any failure to maintain the stipulated Security Cover may adversely affect the interests of the Debenture Holders and may also constitute an Event of Default under the Transaction Documents. Further, please refer to Section 3 (<i>Risk Factors</i>) of the General Information Document.

Dear Sir/Madam,

Re: Rating Letter for non-convertible debenture (NCD) programme of UGRO Capital Limited

India Ratings and Research (Ind-Ra) is pleased to communicate the rating of :

- INR 30014.2mn NCDs: IND A+/Positive
- INR 6500mn Subordinate Debt: IND A+/Positive

In issuing and maintaining its ratings, India Ratings relies on factual information it receives from issuers and underwriters and from other sources India Ratings believes to be credible. India Ratings conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security.

The manner of India Ratings' factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in India where the rated security is offered and sold, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors

Users of India Ratings' ratings should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information India Ratings relies on in connection with a rating will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to India Ratings and to the market in offering documents and other reports. In issuing its ratings India Ratings must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings can be affected by future events or conditions that were not anticipated at the time a rating was issued or affirmed.

India Ratings seeks to continuously improve its ratings criteria and methodologies, and periodically updates the descriptions on its website of its criteria and methodologies for securities of a given type. The criteria and methodology used to determine a rating action are those in effect at the time the rating action is taken, which for public ratings is the date of the related rating action commentary. Each rating action commentary provides information about the criteria and methodology used to arrive at the stated rating, which may differ from the general criteria and methodology for the applicable security type posted on the website at a given time. For this reason, you should always consult the applicable rating action commentary for the most accurate information on the basis of any given public rating.

Ratings are based on established criteria and methodologies that India Ratings is continuously evaluating and updating. Therefore, ratings are the collective work product of India Ratings and no individual, or group of individuals, is solely responsible for a rating. All India Ratings reports have shared authorship. Individuals identified in an India Ratings report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only.

Ratings are not a recommendation or suggestion, directly or indirectly, to you or any other person, to buy, sell, make or hold any investment, loan or security or to undertake any investment strategy with respect to any investment, loan or security or any issuer. Ratings do not comment on the adequacy of market price, the suitability of any investment, loan or security for a particular investor (including without limitation, any accounting and/or regulatory treatment), or the tax-exempt nature or taxability of payments made in respect of any investment, loan or security. India Ratings is not your advisor, nor is India Ratings providing to you or any other party any financial advice, or any legal, auditing, accounting, appraisal, valuation or actuarial services. A rating should not be viewed as a replacement for such advice or services. Investors may find India Ratings ratings to be important information, and India Ratings notes that you are responsible for communicating the

contents of this letter, and any changes with respect to the rating, to investors.

It will be important that you promptly provide us with all information that may be material to the ratings so that our ratings continue to be appropriate. Ratings may be raised, lowered, withdrawn, or placed on Rating Watch due to changes in, additions to, accuracy of or the inadequacy of information or for any other reason India Ratings deems sufficient.

details in the annexure

Analytical Approach

Ind-Ra has fully consolidated the financial and credit profiles of UGRO and Profectus Capital Private Limited (PCPL) to arrive at the ratings, against the previous standalone view, in view of UGRO’s acquisition of 100% stake in PCPL.

Detailed Rationale of the Rating Action

The affirmation and Positive Outlook reflect the growth in the franchisee post the acquisition of PCPL in FY26 and strengthening of UGRO’s presence in its core product segments—prime loan against property (prime LAP) and machinery finance. The acquisition has enhanced UGRO’s product diversification through the addition of the school financing portfolio. The consolidated entity would have a higher proportion of secured lending and on-book portfolio, with consolidated assets under management (AUM) estimated to be around INR150 billion. UGRO is also set to benefit from the diversification of the lender base due to this acquisition.

Ind-Ra has resolved the the Rating Watch with Positive Implications in view of the completion of PCPL’s acquisition and the receipt of greater clarity on the strategic, and operational linkages between UGRO and PCPL.

The ratings remain constrained by the modest profitability due to elevated opex metrics and marginally higher cost of funds. Ind-Ra will monitor the synergistic benefits of this acquisition. The agency believes the focus on higher-yielding segments can boost profitability for the consolidated entity, provided the credit cost is kept under control.

List of Key Rating Drivers

Strengths

- Strong growth in franchisee
- Adequate capital buffers
- Focused on funding MSMEs; geographically and sectorally diversified exposure across MSME value chain
- Significant off-book proportion supports profitability
- Diversified funding mix and lender base

Weaknesses

- Limited track record; asset quality seasoning needs to be established
- Moderate profitability, but improvement likely once operational leverage and synergy benefits accrue

Detailed Description of Key Rating Drivers

Strong Growth in Franchise: UGRO's AUM grew strongly to INR122 billion at 1HFYE26 (FYE25: INR120 billion; FYE24: INR90.5 billion), largely driven by the build-up of strong distribution capabilities coupled with its off-book AUM, which increased to INR52.7 billion (INR50.1 billion; INR40.1 billion). The acquisition of PCPL would further enhance UGRO's market position, and fortify its position as a micro, small medium enterprise (MSME) lender, taking its AUM to over INR150 billion. Additionally, post the acquisition, the composition of the book would change on a consolidated basis, with the off-book share declining to 35% from 43% in 1HFY26, and the share of secured assets rising to nearly 85% from 78% at 1HFYE26. The acquisition would help diversify UGRO's portfolio, with the addition of PCPL's school financing business, which was worth INR8.2 billion at 1HFYE26. The supply chain financing (SCF) portfolio and on-lending portfolio, which was part of PCPL's book, will be phased out.

Furthermore, UGRO witnessed a significant expansion in capacity over FY21–2QFY26, with the branch count increasing to 325 from 25. Of these, 23 are prime branches, while 302 are emerging market (EM) branches. The company has aggressively opened branches in the EM segment in the last four quarters, adding 215 branches since 2QFY25. The branches have low vintage, and most of them would require 12–18 months to deliver a steady state performance.

Adequate Capital Buffers: UGRO has a demonstrated track record of capital raising. In 2QFY26, the company announced a capital raise of around INR9.1 billion through a preferential issue of compulsory convertible debentures (CCDs) worth INR5.3 billion, against an initial plan of INR9.1 billion, and a rights issue of INR3.8 billion. The funds raised through the CCDs have been used to finance the acquisition of PCPL. This capital raise was in addition to INR12.7 billion raised in FY25, which included INR2.5 billion through CCDs and the remainder through the issuance of warrants. Of this, INR5 billion has been received. However, the balance was not realised, as the share price was below the warrant exercise price.

UGRO has built adequate capital buffers, with a capital base of INR24.6 billion at 2QFYE26 (FYE25: INR 20.5 billion; FYE24: INR 14.4 billion) and a capital adequacy ratio of 25.4% (19.4%; 20.75%; 20.2%). Furthermore, the leverage (debt/equity) stood at 3.3x in 2QFY26 (FY25: 3.4x; FY24: 3.2x). The management expects the leverage to fall below 4.0x on a steady state basis. Ind-Ra expects UGRO to maintain a significant buffer in Tier I capital over the regulatory minimum requirement due to the significant proportion of off-book volumes in the AUM mix. Consequently, to maintain an adequate capital buffer, UGRO intends to raise sizeable equity capital in FY27. PCPL's capital buffers are strong, with a Tier I ratio of 37% and a leverage ratio of 1.45x at 1QFYE26.

Focused on funding MSMEs; Geographically and Sectorally Diversified Exposure across MSME Value Chain:

UGRO is a non-banking financial company focused on providing funding across the MSME segment – secured against property as collateral, funding for the purchase of machinery, supply chain financing and unsecured business loans. The average ticket size of the products ranges between INR0.5 million and INR9.5 million, with the upper cap being INR50 million for secured products and INR5 million for unsecured business loans. Since coming into existence in 2018, the entity has built an AUM of INR120.8 billion despite being impacted by the COVID-19 pandemic for a large part of this period. Furthermore, the entity operates out of 325 branches (23 prime and rest for micro enterprises), present across 12 Indian states. In addition, the AUM is diversified across 10 key sectors, with the largest end-segment constituting 36% of the AUM. The agency opines the product, geography and end-segment diversification bodes well for UGRO, given the

volatility that the customer segment is known to face through economic cycles.

UGRO has re-calibrated its strategy and is focused on growing high yielding, secured products. It plans to expand its emerging market loan reach by adding more micro branches. In supply chain financing, the company is focusing on running down the old book, which had exposure mainly to wholesaler distributor/dealers, and UGRO intends to target retailers henceforth. The entity has undertaken this shift mainly to improve its margins and improve its return on assets to the desired level of 4%. It also wants to maintain the share of the unsecured business segment, but it is capped at 30%. With the acquisition of PCPL, the share of unsecured would come down further. Additionally, the acquisition has enhanced UGRO's portfolio, as PCPL's borrower segment is comparable to UGRO's prime segment.

Significant Off-Book Proportion Supports Profitability: UGRO has been targeting strong growth in capital-light, off-balance sheet products by expanding its lending under co-lending, which accounts for 49% of the off-book, direct assignment (28%), and co-origination segments (23%). The strategy to target the off-book segment was built into its mode and has been consistent. The combined share of these segments in the AUM rose sharply to 44% in 2QFY26 from 16% in FY22, even as the overall AUM grew more than 3x to INR120 billion during the same period. In addition to being less demanding on capital buffers, off-book growth has provided a steady source of income for UGRO. However, following the acquisition of PCPL, the share of off-book AUM would decline to nearly 35% as PCPL has a lower share of off-book at around 10%, mainly through direct assignment transactions. UGRO has also recalibrated its strategy and now plans to maintain off-book share of around 35%, down from the earlier guidance of 50%.

Diversified Funding Mix and Lender Base: UGRO has mobilised funds from 59 financiers, including some of the largest public and private sector banks. At end-September 2025, term loans from banks, small finance banks, non-banking financial companies and financial institutions accounted for 35.5%, 3.2%, 10.2%, and 7.8%, respectively, of the total borrowings. Working capital loans constituted an additional 4.3% of the total borrowings in 1HFY26, non-convertible debentures, commercial paper, and market-linked debentures made up 26.5%, and external commercial borrowings (ECBs) accounted for 13.7%. Given the scale at which UGRO operates, the number of lending relationships is considered adequate, and the liability mix remains well diversified. UGRO's focus on co-lending with 16 partners also serves as an additional source of funding. Furthermore, to support its growing funding needs, UGRO consolidated its lender base to 59 by 1HFYE26 (FYE25: 59; FYE24: 57), helping deepen relationships with its existing lenders.

With the acquisition of PCPL, UGRO would benefit from the addition of certain private banks that were previously not part of its lender base. PCPL has lending relationships with 35 lenders, and its borrowings mix is well diversified, with 47% of its borrowings being from private banks, followed by non-banking finance companies (13%), public sector banks (17%) and small finance banks (8%). Furthermore, NCDs constituted 15.1% of its total borrowings. The agency opines that, on a consolidated basis, the blended cost of funding is likely to see a marginal improvement.

Limited Track Record: Asset Quality Seasoning Needs to be Established: UGRO began operations in 2018 and has built an AUM of INR120 billion since then. While UGRO's portfolio has been witnessing strong growth, the franchise size remains at a medium level. Also, the seasoning in the portfolio is low, as nearly 67% of the AUM was generated in the 12 months ended June 2025.

The gross stage 3 assets for UGRO stood at 2.4% in 2QFY26 (FY25:2.3%; FY24: 2.0%; FY23: 1.6%), with credit costs of 1.9% (on average AUM). Also, the stage 3 provisions coverage was 47% in 2QFY26 (FY25: 47%; FY24:48%; FY23: 49%), with total provisions at 1.1% of the AUM. In terms of the restructured portfolio, the book remains small, with an outstanding restructured book accounting for 0.2% of the AUM at 2QFYE26, of which most is secured. In recent quarters, disbursement growth has been primarily driven by relatively new segments such as embedded finance and the EM segment, which contributed 38% and 23%, respectively, to net disbursements in 1HFY26. Seasonality in these portfolios is low, and given the limited seasoning of these business verticals, Ind-Ra believes that controlling softer bucket migration needs to be actively monitored as the scale rises; this will remain a key monitorable for the agency. [That said](#), the acquisition of PCPL would increase the share of secured products, particularly prime LAP and machinery financing, which have historically shown steady asset quality trends with subdued credit costs. Additionally, UGRO has capped its unsecured exposure at 30% and this exposure will be backed by credit guarantee fund trust for micro and small enterprises (CGTMSE); at 2QFY26, nearly 60% of the unsecured business segment was covered with CGTMSE, and UGRO intends to roll it out to majority of the segment.

PCPL's GNPA stood at 2.0% in 2QFY26 (FY25: 1.6%; FY24: 1.4%), with credit costs of 0.71% (on on-book AUM). Also, the stage 3 provision stood at 39% in 2QFY26 (FY25: 33.3%; FY24: 30.8%), with total provisions at 0.9% of the total AUM.

Moderate Profitability, But Improvement Likely Once Operational Leverage and Synergy Benefits Accrue: UGRO has been reporting a profit before tax, although it has been at modest levels due to the high operating costs. The opex to AUM inched up to 4.9% during 2QFY26 (FY25: 4.2%; FY24: 4.5%), led by increased opex towards capacity building during the year. Although it has moderated from its long-term trend, with an average of 6.1% between FY21-FY23, it remains at an elevated level, thus putting pressure on the profitability. The company plans to focus on its granular portfolio, and has consequently increased its branch count, setting up mostly micro-branches, which will keep its opex at elevated levels over the next few quarters; however, if the expansion is executed well, it will provide a big fillip to the return on AUM (2QFY26: 1.5%; FY25: 1.4%; FY24: 1.6%). Ind-Ra opines UGRO will only be fully able to capitalise on its investment if it can keep its credit costs in check across multiple cycles and product lines.

With the acquisition of PCPL, the management expects to benefit from operating leverage by rationalising costs at PCPL, where opex remained elevated at 5.6% at 1HFYE26 (FY25: 5.2%; FY24: 5.1%). The management expects to realise synergies of around INR1.2 billion through cost rationalisation at PCPL. If achieved, this could provide a significant boost to profitability.

Liquidity

UGRO

Adequate: At 2QFYE26, UGRO had a total liquidity of around INR22 billion, comprising unencumbered cash, liquid investments, and unutilised bank lines, which are sufficient to meet its three months of debt obligations of INR10.4 billion, without considering any inflows from collections. According to the behavioural asset-liability management statement at end-September 2025, the company maintains a cumulative surplus in all-time buckets. Furthermore, on a steady-state basis, UGRO aims to keep on-balance sheet liquidity sufficient for three months' debt re-payment, considering nil collection. At end-September 2025, UGRO had an AUM of about INR122 billion, of which assets worth INR69.55 billion were on-balance sheet assets. Furthermore, it can raise money through securitisation transaction. The company has co-lending partners to fund borrowers for its offerings. UGRO expects the institutional co-lending model to generate significant opportunities for off-balance sheet assets with regards to liquidity and funding requirements on an ongoing basis.

PCPL

Adequate: The company's liquidity profile is supported by its low leverage. The contractual asset-liability statement at 2QFYE26 displayed a cumulative surplus of 9.2% in the up-to-one-year time bucket. On applying stress on the inflows to account for any potential volatility in the collection scenario, the asset liability statement continues to reflect a cumulative surplus in the up-to-one-year time bucket. In the past, the management has maintained on-balance sheet liquidity to meet two months of maturing debt obligations. As on 30 September 2025, the company had cash and liquid investment of INR3.0 billion, which is adequate to cover maturing debt obligations of INR1.4 billion for the next two months, assuming nil collections and disbursements. Additionally, it has a cash credit line of INR110 million.

Rating Sensitivities

Positive: The following developments could collectively result in a positive rating action:

Analytical Approach

Ind-Ra has fully consolidated the financial and credit profiles of UGRO and Profectus Capital Private Limited (PCPL) to arrive at the ratings, against the previous standalone view, in view of UGRO’s acquisition of 100% stake in PCPL.

Detailed Rationale of the Rating Action

The affirmation and Positive Outlook reflect the growth in the franchisee post the acquisition of PCPL in FY26 and strengthening of UGRO’s presence in its core product segments—prime loan against property (prime LAP) and machinery finance. The acquisition has enhanced UGRO’s product diversification through the addition of the school financing portfolio. The consolidated entity would have a higher proportion of secured lending and on-book portfolio, with consolidated assets under management (AUM) estimated to be around INR150 billion. UGRO is also set to benefit from the diversification of the lender base due to this acquisition.

Ind-Ra has resolved the the Rating Watch with Positive Implications in view of the completion of PCPL’s acquisition and the receipt of greater clarity on the strategic, and operational linkages between UGRO and PCPL.

The ratings remain constrained by the modest profitability due to elevated opex metrics and marginally higher cost of funds. Ind-Ra will monitor the synergistic benefits of this acquisition. The agency believes the focus on higher-yielding segments can boost profitability for the consolidated entity, provided the credit cost is kept under control.

List of Key Rating Drivers

Strengths

- Strong growth in franchisee
- Adequate capital buffers
- Focused on funding MSMEs; geographically and sectorally diversified exposure across MSME value chain
- Significant off-book proportion supports profitability
- Diversified funding mix and lender base

Weaknesses

- Limited track record; asset quality seasoning needs to be established
- Moderate profitability, but improvement likely once operational leverage and synergy benefits accrue

Detailed Description of Key Rating Drivers

Strong Growth in Franchise: UGRO’s AUM grew strongly to INR122 billion at 1HFYE26 (FYE25: INR120 billion; FYE24: INR90.5 billion), largely driven by the build-up of strong distribution capabilities coupled with its off-book AUM, which increased to INR52.7 billion (INR50.1 billion; INR40.1 billion). The acquisition of PCPL would further enhance UGRO’s market position, and fortify its position as a micro, small medium enterprise (MSME) lender, taking its AUM to over INR150 billion. Additionally, post the acquisition, the composition of the book would change on a consolidated basis, with the off-book share declining to 35% from 43% in 1HFY26, and the share of secured assets rising to nearly 85% from 78% at 1HFYE26. The acquisition would help diversify UGRO’s portfolio, with the addition of PCPL’s school financing business, which was worth INR8.2 billion at 1HFYE26. The supply chain financing (SCF) portfolio and on-lending portfolio, which was part of PCPL’s book, will be phased out.

Furthermore, UGRO witnessed a significant expansion in capacity over FY21–2QFY26, with the branch count increasing to 325 from 25. Of these, 23 are prime branches, while 302 are emerging market (EM) branches. The company has aggressively opened branches in the EM segment in the last four quarters, adding 215 branches since 2QFY25. The branches have low vintage, and most of them would require 12–18 months to deliver a steady state performance.

Adequate Capital Buffers: UGRO has a demonstrated track record of capital raising. In 2QFY26, the company announced a capital raise of around INR9.1 billion through a preferential issue of compulsory convertible debentures (CCDs) worth INR5.3 billion, against an initial plan of INR9.1 billion, and a rights issue of INR3.8 billion. The funds raised through the CCDs have been used to finance the acquisition of PCPL. This capital raise was in addition to INR12.7 billion raised in FY25, which included INR2.5 billion through CCDs and the remainder through the issuance of warrants. Of this, INR5 billion has been received. However, the balance was not realised, as the share price was below the warrant exercise price.

UGRO has built adequate capital buffers, with a capital base of INR24.6 billion at 2QFYE26 (FYE25: INR 20.5 billion; FYE24: INR 14.4 billion) and a capital adequacy ratio of 25.4% (19.4%; 20.75%; 20.2%). Furthermore, the leverage (debt/equity) stood at 3.3x in 2QFY26 (FY25: 3.4x; FY24: 3.2x). The management expects the leverage to fall below 4.0x on a steady state basis. Ind-Ra expects UGRO to maintain a significant buffer in Tier I capital over the regulatory minimum requirement due to the significant proportion of off-book volumes in the AUM mix. Consequently, to maintain an adequate capital buffer, UGRO intends to raise sizeable equity capital in FY27. PCPL’s capital buffers are strong, with a Tier I ratio of 37% and a leverage ratio of 1.45x at 1QFYE26.

Focused on funding MSMEs; Geographically and Sectorally Diversified Exposure across MSME Value Chain: UGRO is a non-banking financial company focused on providing funding across the MSME segment – secured against property as collateral, funding for the purchase of machinery, supply chain financing and unsecured business loans. The average ticket size of the products ranges between INR0.5 million and INR9.5 million, with the upper cap being INR50 million for secured products and INR5 million for unsecured business loans. Since coming into existence in 2018, the entity has built an AUM of INR120.8 billion despite being impacted by the COVID-19 pandemic for a large part of this period. Furthermore, the entity operates out of 325 branches (23 prime and rest for micro enterprises), present across 12 Indian states. In addition, the AUM is diversified across 10 key sectors, with the largest

end-segment constituting 36% of the AUM. The agency opines the product, geography and end-segment diversification bodes well for UGRO, given the volatility that the customer segment is known to face through economic cycles.

UGRO has re-calibrated its strategy and is focused on growing high yielding, secured products. It plans to expand its emerging market loan reach by adding more micro branches. In supply chain financing, the company is focusing on running down the old book, which had exposure mainly to wholesaler distributor/dealers, and UGRO intends to target retailers henceforth. The entity has undertaken this shift mainly to improve its margins and improve its return on assets to the desired level of 4%. It also wants to maintain the share of the unsecured business segment, but it is capped at 30%. With the acquisition of PCPL, the share of unsecured would come down further. Additionally, the acquisition has enhanced UGRO's portfolio, as PCPL's borrower segment is comparable to UGRO's prime segment.

Significant Off-Book Proportion Supports Profitability: UGRO has been targeting strong growth in capital-light, off-balance sheet products by expanding its lending under co-lending, which accounts for 49% of the off-book, direct assignment (28%), and co-origination segments (23%). The strategy to target the off-book segment was built into its mode and has been consistent. The combined share of these segments in the AUM rose sharply to 44% in 2QFY26 from 16% in FY22, even as the overall AUM grew more than 3x to INR120 billion during the same period. In addition to being less demanding on capital buffers, off-book growth has provided a steady source of income for UGRO. However, following the acquisition of PCPL, the share of off-book AUM would decline to nearly 35% as PCPL has a lower share of off-book at around 10%, mainly through direct assignment transactions. UGRO has also recalibrated its strategy and now plans to maintain off-book share of around 35%, down from the earlier guidance of 50%.

Diversified Funding Mix and Lender Base: UGRO has mobilised funds from 59 financiers, including some of the largest public and private sector banks. At end-September 2025, term loans from banks, small finance banks, non-banking financial companies and financial institutions accounted for 35.5%, 3.2%, 10.2%, and 7.8%, respectively, of the total borrowings. Working capital loans constituted an additional 4.3% of the total borrowings in 1HFY26, non-convertible debentures, commercial paper, and market-linked debentures made up 26.5%, and external commercial borrowings (ECBs) accounted for 13.7% .Given the scale at which UGRO operates, the number of lending relationships is considered adequate, and the liability mix remains well diversified. UGRO's focus on co-lending with 16 partners also serves as an additional source of funding. Furthermore, to support its growing funding needs, UGRO consolidated its lender base to 59 by 1HFYE26 (FYE25: 59; FYE24: 57), helping deepen relationships with its existing lenders.

With the acquisition of PCPL, UGRO would benefit from the addition of certain private banks that were previously not part of its lender base. PCPL has lending relationships with 35 lenders, and its borrowings mix is well diversified, with 47% of its borrowings being from private banks, followed by non-banking finance companies (13%), public sector banks (17%) and small finance banks (8%). Furthermore, NCDs constituted 15.1% of its total borrowings. The agency opines that, on a consolidated basis, the blended cost of funding is likely to see a marginal improvement.

Limited Track Record: Asset Quality Seasoning Needs to be Established: UGRO began operations in 2018 and has built an AUM of INR120 billion since then. While UGRO's portfolio has been witnessing strong growth, the franchise size remains at a medium level. Also, the seasoning in the portfolio is low, as nearly 67% of the AUM was generated in the 12 months ended June 2025.

The gross stage 3 assets for UGRO stood at 2.4% in 2QFY26 (FY25:2.3%; FY24: 2.0%; FY23: 1.6%), with credit costs of 1.9% (on average AUM). Also, the stage 3 provisions coverage was 47% in 2QFY26 (FY25: 47%; FY24:48%; FY23: 49%), with total provisions at 1.1% of the AUM. In terms of the restructured portfolio, the book remains small, with an outstanding restructured book accounting for 0.2% of the AUM at 2QFYE26, of which most is secured. In recent quarters, disbursement growth has been primarily driven by relatively new segments such as embedded finance and the EM segment, which contributed 38% and 23%, respectively, to net disbursements in 1HFY26. Seasonality in these portfolios is low, and given the limited seasoning of these business verticals, Ind-Ra believes that controlling softer bucket migration needs to be actively monitored as the scale rises; this will remain a key monitorable for the agency.That said, the acquisition of PCPL would increase the share of secured products, particularly prime LAP and machinery financing, which have historically shown steady asset quality trends with subdued credit costs. Additionally, UGRO has capped its unsecured exposure at 30% and this exposure will be backed by credit guarantee fund trust for micro and small enterprises (CGTMSE); at 2QFY26, nearly 60% of the unsecured business segment was covered with CGTMSE, and UGRO intends to roll it out to majority of the segment.

PCPL's GNPA stood at 2.0% in 2QFY26 (FY25:1.6%; FY24: 1.4%), with credit costs of 0.71% (on on-book AUM). Also, the stage 3 provision stood at 39% in 2QFY26 (FY25: 33.3%; FY24: 30.8%), with total provisions at 0.9% of the total AUM.

Moderate Profitability, But Improvement Likely Once Operational Leverage and Synergy Benefits Accrue: UGRO has been reporting a profit before tax, although it has been at modest levels due to the high operating costs. The opex to AUM inched up to 4.9% during 2QFY26 (FY25: 4.2%; FY24: 4.5%), led by increased opex towards capacity building during the year. Although it has moderated from its long-term trend, with an average of 6.1% between FY21-FY23, it remains at an elevated level, thus putting pressure on the profitability. The company plans to focus on its granular portfolio, and has consequently increased its branch count, setting up mostly micro-branches, which will keep its opex at elevated levels over the next few quarters; however, if the expansion is executed well, it will provide a big fillip to the return on AUM (2QFY26: 1.5%; FY25: 1.4%; FY24: 1.6%). Ind-Ra opines UGRO will only be fully able to capitalise on its investment if it can keep its credit costs in check across multiple cycles and product lines.

With the acquisition of PCPL, the management expects to benefit from operating leverage by rationalising costs at PCPL, where opex remained elevated at 5.6% at 1HFYE26 (FY25: 5.2%; FY24: 5.1%). The management expects to realise synergies of around INR1.2 billion through cost rationalisation at PCPL. If achieved, this could provide a significant boost to profitability.

Liquidity

UGRO

Adequate: At 2QFYE26, UGRO had a total liquidity of around INR22 billion, comprising unencumbered cash, liquid investments, and unutilised bank lines, which are sufficient to meet its three months of debt obligations of INR10.4 billion, without considering any inflows from collections. According to the behavioural asset-liability management statement at end-September 2025, the company maintains a cumulative surplus in all-time buckets. Furthermore, on a steady-state basis, UGRO aims to keep on-balance sheet liquidity sufficient for three months' debt re-payment, considering nil collection. At end-September 2025, UGRO had an AUM of about INR122 billion, of which assets worth INR69.55 billion were on-balance sheet assets. Furthermore, it can raise money through securitisation transaction. The company has co-lending partners to fund borrowers for its offerings. UGRO expects the institutional co-lending model to generate significant opportunities for off-balance sheet assets with regards to liquidity and funding requirements on an ongoing basis.

PCPL

Adequate: The company's liquidity profile is supported by its low leverage. The contractual asset-liability statement at 2QFYE26 displayed a cumulative surplus of 9.2% in the up-to-one-year time bucket. On applying stress on the inflows to account for any potential volatility in the collection scenario, the asset liability statement continues to reflect a cumulative surplus in the up-to-one-year time bucket. In the past, the management has maintained on-balance sheet liquidity to meet two months of maturing debt obligations. As on 30 September 2025, the company had cash and liquid investment of INR3.0 billion, which is adequate to cover maturing debt obligations of INR1.4 billion for the next two months, assuming nil collections and disbursements. Additionally, it has a cash credit line of INR110 million.

Further, in order to secure the borrowing(s) availed/to be availed by the Company, it would be necessary to create charge or mortgage on the assets or whole of the undertaking of the Company.
